Jeremy Lee Jia Ren

Summary

Passionate for frontend web development and web design, seeking a full time frontend position. Has experience in web development proven by multiple team projects, freelancing web design work, and a portfolio website. Looking to leverage his experience in building responsive web applications to solve problems that directly benefit end-users.

Team Projects

Money Managing Web Application (Moneger)

📅 June 2021 - Present   🔗 Moneger Progress Log

- Building the frontend of a full stack money managing web application using React and the MERN stack.
- Designed mockups and wireframes for the UI/UX of the web application using design systems on Figma.
- Converting mockup designs into reusable React UI components.
- Collaborating with a team of 6 developers to implementing clean, maintainable, and reusable code.

URL Shortener (Spshurl)

📅 Jan 2021 - Mar 2021   🔗 spshurl.herokuapp.com/

- Designed and developed a dynamic and responsive web application that shortens long URLs using the Flask framework.
- Formulated all frontend code from concept through completion and using JavaScript libraries such as Bootstrap and Gsap.
- Managed code using Git and Github with a team of 3 backend engineers.
- Collaborated with the University of Pahang Malaysia IEM team for their virtual events as the official data partner.

Freelancing Work

Redesign Entire UI of Website (Wix)

📅 Feb 2021 - June 2021   🔗 urosense.com

Hired to redesign the entire UI of the website on Wix. Successfully transformed the urosense.com to a modern and professional website that reflects the company brand. Gained experience in implementing fundamental UI/ UX principles and using the Wix platform.

Injected Code Into E-Commerse Website (Shopify)

📅 Feb 2021 - Mar 2021   🔗 twopeas.art

Hired to implement custom CSS and JavaScript code to achieve design choices that was not available through the editor. Gained experience in Shopify's template language, Liquid.
